PROFESSIONAL SUMMARY

Glenn is an active fifth-semester Diploma student in Information Systems at the Faculty of Computer Science, UPN "Veteran" Jakarta, with a strong interest in data analytics and business intelligence. He has experience in cleaning, processing, analyzing, and visualizing data through academic projects, bootcamps, and collaborative mini projects using Microsoft Excel, SQL, Google BigQuery, Python, Tableau, and Google Looker Studio. He is familiar with exploratory data analysis, interactive dashboard development, classification, clustering, and machine learning model evaluation using Scikit-learn. Glenn possesses strong analytical thinking, attention to detail, teamwork, and communication skills, and is currently seeking a Data Analyst or Business Intelligence internship to apply and further develop his technical skills in a professional environment.

EDUCATION

UPN "Veteran" Jakarta	<i>2024-present</i>
Diploma in Information Systems, Faculty of Computer Science (GPA: 3.85/4.00)	
SMAN 1 Matauli Pandan	<i>2019-2022</i>
Majored in Natural Sciences	

VOLUNTEER EXPERIENCE

Event Committee, Christmas Youth Celebration (Natal Naposo), HKBP Cinere	<i>Desember 2025</i>
- Contributed as a member of the event division committee, supporting the planning and execution of the Christmas youth event. - Composed and arranged music, including editing background soundtracks for drama performances. - Guided and coached drama performers for stage presentations (fragmen). - Assisted in training musicians for worship sessions, ensuring coordination and performance readiness.	

PROJECT EXPERIENCE

Kitchen Equipment Sales Performance Analysis, KarirNex Data Analyst Bootcamp	<i>July 2026</i>
- Conducted an end-to-end analysis of kitchen equipment sales data using Microsoft Excel, Google BigQuery, Python, and Google Looker Studio. - Cleaned and validated transaction data, developed SQL queries, and performed exploratory data analysis to evaluate revenue, order status, shipping costs, refunds, product performance, and regional sales trends. - Developed an interactive dashboard presenting key metrics, including total sales, completed orders, completion rate, monthly sales trends, category contribution, top-performing products, and highest-performing cities. - Generated actionable business insights, including 2,156 completed orders generating approximately IDR 1.30 billion in Q4 2025 and an annual refund value equivalent to 4.76% of gross sales. - Tools: Microsoft Excel, Google BigQuery, SQL, Python, Pandas, Google Colab, Google Looker Studio.	
Retail Sales Analytical Report, SpecialSkill Data Analyst Bootcamp	<i>July 2026</i>
- Analyzed retail transaction data using Microsoft Excel to identify sales trends, product performance, customer characteristics, and purchasing patterns. - Performed data assessment, data cleaning, descriptive statistical analysis, exploratory data analysis, and data visualization using PivotTables, formulas, and charts. - Evaluated monthly sales fluctuations, product-category performance, customer distribution by gender and age group, and the relationship between quantity purchased and total transaction value. - Presented the findings in a structured analytical report and developed data-driven recommendations to support sales evaluation and customer segmentation. - Tools: Microsoft Excel, PivotTables, Excel Formulas, Data Visualization.	
Heart Disease Prediction Using Machine Learning, POINTER 2026 Mini Project	<i>June 2026</i>
- Collaborated on the development of a machine learning classification model to predict heart disease indications using clinical patient data consisting of 734 training records and 184 test records. - Performed data cleaning and preprocessing, including handling implausible zero values, median imputation, categorical feature encoding, numerical feature scaling, and stratified train-validation splitting. - Trained and compared seven classification algorithms, including Logistic Regression, SVC, K-Nearest Neighbors, Decision Tree, Random Forest, Gradient Boosting, and AdaBoost. - Selected K-Nearest Neighbors as the best-performing model, achieving 88.4% accuracy, 88.2% macro F1-score, 88.9% macro precision, and 87.9% macro recall. - Tools: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Google Colab.	

Fuel Sales Analysis and Business Intelligence Dashboard, Academic Project	<i>June 2026</i>
- Processed and analyzed 500 fuel sales records using Python through data cleaning, preprocessing, feature engineering, and exploratory data analysis. - Implemented K-Means clustering using nine standardized numerical features and identified two transaction clusters representing lower- and higher-value sales patterns based on Elbow Method and Silhouette Score evaluation. - Developed two interactive Tableau dashboards presenting sales KPIs, revenue trends, performance comparisons, and transaction cluster distributions through dynamic filters and tooltips. - Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Google Colab, Tableau Public, Microsoft Excel.	
Telco Customer Churn Prediction, Academic Project	<i>June 2026</i>
- Collaborated on the analysis of 7,043 telecommunication customer records using the Knowledge Discovery in Databases (KDD) framework. - Preprocessed and transformed customer data through missing-value handling, feature engineering, categorical encoding, feature scaling, and stratified train-test splitting. - Developed and compared Logistic Regression and Decision Tree models using GridSearchCV, selecting Decision Tree based on an F1-score of 62.08%. - Identified that Senior Citizen customers had a churn rate of 41.68%, substantially higher than the 23.61% churn rate among Non-Senior Citizen customers. - Tools: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Google Colab.	
University Workforce Analytics Dashboard, Academic Project	<i>June 2026</i>
- Collaborated on cleaning and analyzing 725 university employee records across 16 attributes, including missing-value assessment, duplicate detection, data validation, and category consistency checks. - Developed three interactive Tableau dashboards presenting workforce KPIs, faculty distribution, employment status, age profiles, academic-position trends, and employee certification patterns. - Identified workforce insights, including a 93.4% active employee rate, an average age of 45 years, and 56.7% of employees who had not yet obtained certification. - Tools: Microsoft Excel, Tableau Public.	

AWARDS

1st Place, FIK Got Talent, BEM Faculty of Computer Science, UPN Veteran Jakarta	<i>October 2024</i>
2nd Place, Men's Swimming Competition, Matauli Sport League	<i>2021</i>
Participant, FLS2N Solo Guitar Provincial Level North Sumatera, Education Office of North Sumatera Province	<i>September 2019</i>

CERTIFICATIONS & TRAINING

Data Analyst Bootcamp, KarirNex by PT Ebiz Karisma Internasional	<i>July 2026</i>
- Completed a 20-hour bootcamp covering data cleaning, Microsoft Excel, SQL using Google BigQuery, Python using Google Colab, data visualization, and dashboard development using Google Looker Studio. - Completed an end-to-end kitchen equipment sales analysis mini project and achieved an Expert competency level.	
Data Analyst Bootcamp, SpecialSkill Indonesia	<i>July 2026</i>
- Completed a 24-hour bootcamp covering statistical fundamentals, Microsoft Excel, data cleaning, exploratory data analysis, data visualization, business reporting, and interactive dashboard development using Tableau. - Completed an end-to-end retail sales analysis and reporting project with an Excellent performance rating.	
Program Intensive Learning Workshop (POINTER) 2026, Data Science Center, Universitas Indonesia	<i>June 2026</i>
- Completed a 12-hour intensive workshop covering data science fundamentals, exploratory data analysis, data wrangling, machine learning models, and model evaluation. - Collaborated on a mini project to develop and evaluate a machine learning classification model for heart disease prediction.	
Intro to Data Analytics, Certificate of Completion, Revou	<i>March 2026</i>
- Completed a 1-week certified online course covering the fundamentals of data analytics. - Conducted analysis and win performance prediction on a PUBG Mobile dataset, covering variables such as kills, damage dealt, survival time, and match rank.	
Becoming a Data Analyst in the E-sports & Gaming Industry, Certificate of Participation, Dibimbing.id	<i>March 2026</i>
- Participated in a learning session on the role and career path of a Data Analyst in the e-sports and gaming industry. - Gained insights into real-world data analytics applications within a rapidly growing industry.	

TECHNICAL SKILLS

- **Microsoft Excel:** Data Cleaning, Formulas, PivotTables, Statistical Analysis, and Dashboard Development
- **SQL and Databases:** Google BigQuery, MySQL, Data Querying, Aggregation, and Data Transformation
- **Python:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, and Google Colab
- **Data Analysis:** Data Preprocessing, Exploratory Data Analysis, Descriptive Statistics, and Feature Engineering
- **Data Visualization and Business Intelligence:** Tableau Public, Google Looker Studio, Interactive Dashboards, and Data Storytelling
- **Machine Learning:** Classification, Clustering, Hyperparameter Tuning, and Model Evaluation
- **Business Analysis:** KPI Monitoring, Trend Analysis, and Data-Driven Recommendations

SOFT SKILLS

- Analytical and Critical Thinking
- Problem Solving
- Attention to Detail
- Teamwork and Collaboration
- Communication and Presentation
- Time Management
- Adaptability and Continuous Learning

LANGUAGE

- Indonesia
- English
